PROFESSIONAL SUMMARY

Software Developer focused on creating efficient solutions. My technical strength in Backend (Java, C#) is complemented by my Frontend experience (React, Angular), allowing me to actively collaborate with cross-functional teams to transform business ideas into functional and user-friendly technological products. I am proactive in problem-solving and seek to contribute to projects with real-world impact.

PROFESSIONAL EXPERIENCE

Netone | Fullstack Developer | *August 2025 - October 2025*
Project: Wise Capital (web and mobile asset management platform))

- Responsible for the evolutionary development and maintenance of critical modules on the asset management platform.
- Developed and implemented new backend functionalities (Java EE, Spring Boot, Hibernate), optimizing key business processes and ensuring system performance.
- Automated E2E (End-to-End) functional tests with Cypress for web (Angular) and mobile (Ionic) applications, improving test coverage and accelerating regression detection.

Garret Games (Personal Venture) | Digital Game Sales | 2021 - Present

- Personal business dedicated to digital game sales, autonomously handling all inventory management and customer service.

Las Breñas | Full Stack Developer | Oct 2024 - Feb 2025
- Led (in a two-person team) the design and development of a full-stack e-commerce platform, from initial concept to production launch.
- Designed and implemented the complete solution, including secure authentication (Firebase Auth), a product administration panel, and user profiles, using Next.js (API Routes) and Firestore.

GBM - INGENIERÍA Y AMBIENTE | Frontend Developer | February 2023 - July 2023
- Actively participated in a cross-functional team (developers and designers) for the launch of a new informational website
- Responsible for the UI layout and development, translating UI/UX designs (Figma) into modular, reusable, and responsive React components.

RED SOLANA | Full Stack Developer | November 2022 - March 2023
- Took full ownership of the life cycle (design, development, and deployment) of a full-stack platform for internal casino management.
- Built the application with Next.js (API Routes) and Firebase (Auth, Firestore), developing a comprehensive management module system (CRUD) and a complex sweepstakes feature.

EDUCATION

- **Technician in Web Development |** March 2023 - Present
  Universidad Nacional de La Matanza. (18/20 courses completed)
- **Escuela de Educación Secundaria Técnica N°8 - Jorge Newbery** | 2016 - 2022
  Electromechanical Technician

TECHNICAL SKILLS

- **BACKEND:** Java, Spring, C#, .NET, Node.js, PHP
- **FRONTEND:** React.js, Angular, Next.js, Tailwind CSS, Bootstrap, Thymeleaf
- **DATABASES:** MySQL, PostgreSQL, SQL Server, Firebase, Hibernate, Entity Framework, Prisma
- **TESTING:** Cypress, Jest, xUnit, JUnit
- **TOOLS:** Git, GitHub, Gitlab, Figma, ML.NET

LANGUAGUES

- **English: B2-CEFR** (*Asociación Argentina de Cultura Inglesa*) | 2021
- **Spanish: |** Native
